CALCULATION OF GRADE POINT AVERAGE

Cumulative Grade Point Average (GPA) is calculated per term and over the student's entire academic history with Sheridan. Program Grade Point Averages (effective 2008) are calculated per term and for the specific program. Program Grade Point Averages are based only on the courses that make up the program of study. Courses re-taken will have grades from all attempts recorded on the transcript; however, only the highest grade will be used in the GPA calculations. Grade Point Averages are weighted calculations based on the grade received and the credit value of the course.

An example of a weighted GPA is:

Course Grade	Grade Points		Credit Value		Weighted Credit Value
A+	4.0	x	3.0	=	12.0
B+	3.3	x	3.0	=	9.9
B	3.0	x	3.0	=	9.0
C+	2.5	x	3.0	=	7.5
C	2.0	x	3.0	=	6.0
D	1.0	x	3.0	=	3.0
Total			18.0		47.4

GPA = Total Weighted Credit Value ÷ Total Credit Value

Based on example above:

$$47.4 \div 18.0 = 2.6 \text{ GPA}$$

INCLUDE/EXCLUDE (E/I)

An E/I designation is used to indicate when a course has been repeated. The "I" designation indicates that the course is to be included in the GPA, while the "E" designation indicates that the course will be excluded from the GPA.

HONOURS STANDING

Awarded upon completion of the program.
